

## Value Engineering framework

### Amendment register

May 2026

Title	Section	Change type	Description of change
<i>Framework for Value Engineering Reviews in Major Transport Infrastructure Projects</i>	All	New	Initial publication. This framework provides clear governance, defines key success factors, and promotes multidisciplinary collaboration to optimise project performance, cost efficiency, and long-term asset value. Focusing on total lifecycle costs, functional outcomes, and risk mitigation, the framework ensures projects deliver maximum public value while maintaining safety, quality, and sustainability standards.
