Application:

This sign is a supplementary plate to W4-11. This signing combination is used on sections of two-lane two-way road where there is potential that motorists become confused about whether the road operates as a multi-lane (one way) carriageway. Potential applications include sections of carriageway which are being progressively upgraded to median separated multi-lane flow, or short two-way sections between existing multi-lane sections. For added impact, particularly where there is evidence of incidents or advice of near misses, a red target board can be used at the first sign.

Colour Legend

- Black (legend and border)
- Retroreflective yellow (background)
